

## An Upside-down Degree

The BTAS could be considered an upside down degree in that students entering the program have completed their technical degree programs and will now satisfy university baccalaureate degree requirements.

Students wishing to capitalize on their technical skills may choose to pursue a business-oriented strand of courses, or focus on communications, or acquire additional knowledge in general social sciences.

Depending upon their career and personal goals, students will select courses in social sciences, behavioral sciences, business, and leadership and organization.

Three very unique courses have been developed to Integrate skills and knowledge. Introduction to Technical and Applied Studies, Research for Technical and Applied Studies, and Technical and Applied Studies Seminar will allow students to explore the history and theory of technology and management and leadership,

analyze research and complete projects, and integrate and apply professional knowledge and skills in a hands-on project for a local business, industry, or community organization.

## A Program for You

With appropriate and extensive advising, students will take a sequence of courses that will 1) meet Ohio University's general education and Baccalaureate degree requirements, 2) follow naturally from and amplify the learning experiences in their associate degree subject areas, and 3) qualify them for advancement in their workplaces.
